

VOTE YES ON PROPOSITION 2 TO SUPPORT ALL INDIANS

NO TAX INCREASE

APRIL 8

#ALLIN for ALL INDIANS

On April 8, 2025, voters living in the Hallsville School District will be asked to approve the issuance of \$6.5 million in general obligation bonds. Proposition 2 represents the second phase of a three-phase plan designed to address the district's facility needs and accommodate growth. Phase 1, completed in 2024, added a new middle school wing, storm shelter, and football field. Phase 2 focuses on improving main campus's parking and traffic flow, addressing growing student enrollment, and enhancing student safety.

WHY ARE THESE FUNDS NEEDED?

Hallsville serves over 1,550 students, and enrollment is expected to continue rising as new housing developments are built in and around the community. Hallsville Primary School is currently at 92% capacity and is projected to exceed 100% by 2029, making additional classrooms essential.

With rising enrollment, parking on main campus is limited and provides challenges during school days, evening activities, and special events. Due to the campus layout and pipeline easement, options for expanding or relocating parking lots are restricted. To improve student safety and accessibility, the proposed parking expansion requires relocating the current baseball field and constructing a new baseball field incorporating a multipurpose field for marching band, middle school athletics, outdoor classroom space, and youth sports.

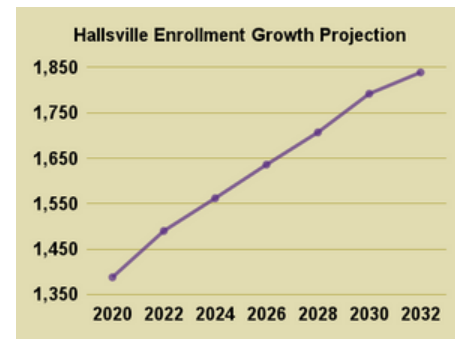

Districts of Comparable Size (2024 Count)

District	Enrollment
Boonville	1,592
Hallsville	1,515
California	1,318
Centralia	1,289
Macon	1,176

HOW WILL THE FUNDS BE USED?

The \$6.5 million generated through bond sales, combined with capital projects reserve fund balances, will complete Phase 2 of the district's facility master plan:

- **Parking & Traffic Flow Improvements:** Expanding parking and improving traffic flow on main campus to address student and guest parking
- **New Classrooms at Hallsville Primary School:** Addressing growing student enrollment
- **Relocated Baseball Field & Multipurpose Field:** Constructing a new baseball field and adding an artificial surface multipurpose field
- **Security Upgrades:** Installing additional security doors at main entrances in the intermediate, middle, and high school
- **Refinancing Lease Obligations:** Paying off a lease-purchase agreement to reduce future financial commitments

WHY IS NO TAX INCREASE NECESSARY?

New home construction and improved property values have led to a modest increase in the district's assessed valuation, raising our debt limit. The district has also responsibly refinanced and repaid bonds from past building projects. Both of these factors open up capacity to issue new bonds while keeping the debt service levy the same. **No tax increase will be required.**

NO TAX INCREASE

APRIL 8

SECURE ENTRY VESTIBULES

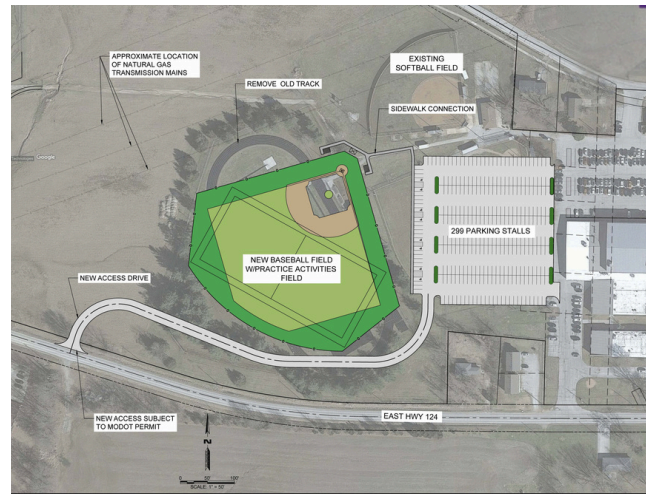

- **Restricted Access:** A second set of security doors prevents unauthorized individuals from gaining immediate access to hallways, classrooms, and students.
- **Enhanced Security Screening:** Installing a second set of doors creates a secure vestibule, ensuring all visitors check in and receive approval before entering the school.
- **Student & Staff Safety:** Secure vestibules help promote a safer learning environment by controlling entry points and reducing security risks.

IMPROVING PARKING, TRAFFIC FLOW, & ACTIVITY SPACES

Proposition 2 expands campus parking and traffic flow, creating new spaces for athletic and school groups.

- **Expanded Parking & Safer Traffic Flow:** A new parking lot with up to 300 additional spaces will improve traffic patterns and reduce congestion during peak travel times and campus events.
- **Enhanced Accessibility:** Improved parking and a new access point off Highway 124 will provide safer, more convenient access for students, staff, and visitors.
- **Baseball Field & Multipurpose Activities Field:** Relocating the baseball field to the site of the former track will allow for the development of a versatile, multipurpose space. Installing an artificial surface creates opportunities for supporting baseball and softball, marching band, athletic practices, and physical education classes during the school day.

2 PRIMARY CLASSROOMS

- **Growing Enrollment:** Hallsville Primary School is currently at 92% capacity and is projected to exceed 100% by 2029, making additional classrooms essential.
